Instruction for Users

Investigator or Researcher registration

- A researcher is any person participating in a medical research in any capacity
- To complete registration and/or submission of a research with NMRR, users are required to provide information on researchers participating in the research. For a researcher to be listed as participant in a project that is being registered, he or she must be registered with NMRR beforehand. Otherwise, his or her name will not appear in the drop down list.
- To register as a researcher on NMRR, just click [<Create a New Account>](#), provides all required information online and click submit.

(Note: Please make sure you tick the Role as Research Investigator)

- A registered researcher will automatically be provided user account on NMRR

New user account

- A user is anybody who needs to conduct business on the NMRR
- The following types of user are automatically provided a user account. Please do not create another user account:
